Priority

1. Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

Drawings

2. Figures 1-2 should be designated by a legend such as --Prior Art-- because only that which is old is illustrated. See MPEP § 608.02(g). A proposed drawing correction or corrected drawings are required in reply to the Office action to avoid abandonment of the application. The objection to the drawings will not be held in abeyance.

Double Patenting

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

3. Claims 1-13 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1,10 of U.S. Patent No. 6,201,519 B1 in view of Van Dijk US Patent No. 6,424,325.

Art Unit: 2673

Although the conflicting claims are not identical, they are not patentably distinct from each other because independent claim 1 in application have correspondence in wording to claims 1 and 10 in the U.S. Patent No. 6,201,519 B1, except for the limitation regarding the sum of the weights of these bits remaining identical from one control word to the other (See in Application Page 24, Lines 17-18) and common knowledge in prior art that the sum of the weight factors associated with those sub field periods determining the luminance (See Col. 1, Lines 26-27 in Dijk reference).

Conclusion

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure:

The Shigeta (US Patent No. 6,064,356) reference discloses driving system for a self-luminous display.
